### Federal Bureau Okays Campus Entrance Roads

Robert E. Kronst, engineer of Illinois Division of Highways District Eight at French Village, announced Friday that the location of the north and south entrance roads to Southern Illinois University's southwestern campus has been approved by the Federal Bureau of Public Roads.

The location of these campus entrance roads and relocation of Illinois Route 143 and Illinois Route 157 (formerly By-pass US 66), which are necessary for interchange connections to the campus entrance roads, were the subject of a public hearing held July 13 at Edwardsville.

The approval includes the location as presented at the public hearing of interchanges to connect the north entrance road to Route 143 and the south entrance road to Route 157, and the relocation of the routes to develop proper interchange geometrics.

Kronst said a frontage road northwest of the interchange of the north entrance road and Route 143 also was approved. This frontage road, as recommended by citizens attending the hearing, will give traffic from north of the interchange direct access to the west as well as to the east on Route 143.

## Yule Handicraft Class Attracts 52 Women

An enthusiastic group of 52 women is registered in the Christmas handicraft program sponsored by the Granite City park district. Sessions are held from 7:30 to 9 p.m. each Wednesday.

Among the traditional items being made are wall and door decorations, which include red felt Santa Claus figures and white feathered Santa faces and wreaths. Novelty pieces consist of chenille Christmas trees, grape clusters, originally-designed Christmas cards and tree ornaments.

A "kissing-ball," constructed of plastic and glitter, containing sprigs of mistletoe, and miniature carolers and angel figurines of craft foam are proving popular projects, Brown added.

Steelworkers also will receive payment of an 11.5 cent per hour actual pay retroactive to May 1, covering the period of negotiations.

## Liquor Commission To Get Reports of Tavern Violations

Three Madison county taverns alleged to be found to be operating after the 1 a.m. closing hour during a widespread tour early Saturday by the sheriff's office.

The cases will be presented to the county liquor commission, according to Sheriff Barney Fraundorf, who is attempting to strengthen the county liquor laws.

Ten members of his staff plus seven special deputies made a sweep of taverns in unincorporated areas for the second weekend in a row.

The report said deputies were served liquor at the Luna cafe in Mitchell and at the Calypso inn north of Collinsville. Sheriff Fraundorf said two of his agents attempted to enter the Orchid lounge at Mitchell at 1 a.m. but were refused admittance. However, he said other persons entered the establishment at 1:20 a.m. and were served alcoholic beverages until 2:30 a.m.

### Night Club Checked

George Ramm, chief deputy sheriff, said a night club outside Granite City was checked because of reports that it was serving liquor to minors, but that he and his aides checked identification cards and found no violations.

The sheriff said he is unable to make arrests in such cases as the tavern checks constitute entrapment, according to the advice of State's Atty. Joseph Bartylak, and is unauthorized under the current law. He said revision of the county ordinance is required to effect a more stringent enforcement of tavern closing hours and to tighten controls on the sale of liquor to minors.

## County Employees Ask \$40 Monthly Raise

An across the board pay increase of \$40 per month for employees was requested Friday, and officials announced the estimated cost of such an increase would be around \$150,000. This amount would wipe out all of an anticipated boost in general revenue from a two-cent tax increase allowed by recent legislation.

About half of the county's employees are members of Local 799 of the State, County and Municipal Employees Union which asked for the increase at a meeting of the county board's finance committee which is now preparing the 1966 county budget.

The parents of the couple are Mrs. Marie Kravec, 2304 East 21st street, and the late Andrew Kravec, and Mrs. Anna Becker, 2900 Nameoski road.

Rev. J. P. Jordan officiated at the 9 a.m. Mass before the altar decorated with bouquets of white gladioli and pom poms. A program of wedding music was furnished by Mrs. Francis Judd, organist, and her son, Richard, vocalist.

Given in marriage by her brother, John Kravec, the bride wore a gown of pure white champagne lace fashioned with a sabbina neckline and long sleeves. The very bouffant skirt, worn over layers of crinoline, featured a front pickup with tiers of lace. Wide tiers in the back etched the train and after the ceremony the train was converted into a bustle.

An arrangement of lace, pearls and crystals held the bride's veil of illusion and she carried a bouquet of stephanotis and ivy centerpieces with a white orchid corsage.

Miss Joan Blankenship was maid of honor; and Miss Janet Timko, Miss Diane Kaleta and Mrs. Kathy Strain served as bridesmaids and Carol Casey as junior maid.

They were dressed alike in candy pink crepe gowns made with scoop necklines and elbow length sleeves. Back panels of lace fell from self bows to the hemlines of the long domed skirts. Matching headpieces were in their hair and they held nosegays of white and pink carnations with white streamers.

The best man was Richard Timko. Paul Strain, Danny Troits and Terry Fick were groomsmen, serving with Michael Wolf, junior groomsmen.

Carla Svoboda and David Adamic were flower girl and ring bearer. The former wore a floor-length dress of white lace with short puffed sleeves and a white satin ribbon encircling her waist.

## Addition at State Hospital Given Ok

Alton State Hospital's new medical-surgery building has been conditionally accepted from contractors by the Department of Mental Health in conjunction with the Division of Architecture and Engineering.

In making the announcement, A. K. Smith, assistant superintendent, said total acceptance of the building is contingent on the completion of minor tasks by the various contractors. The general contractor is S. M. Wilson & Co. of Granite City who began construction in the summer of 1963. Officials from Springfield and hospital officers inspected the building last week and found conditions satisfactory for the conditional status. They and the contractors felt the building should reach total completion by Nov. 16. Smith said that within a month of that date the first floor and the basement should be in operation. He said occupation of the second and third nursing floors would depend upon delivery of room furnishings. No date has been set for a dedication.

## Expansion of 2 GSI Subsidiaries Planned

Expansion plans for two recently acquired subsidiaries were announced this week by General Steel Industries, Inc.

Flex - O - Lite Manufacturing Corp. is constructing a new Canadian plant and Standard Pipe Protection, Inc., has begun operations at a new plant at Pittsburg, Calif.

In making the announcement, W. Ashley Gray Jr., president of General Steel, said that "General Steel Industries conducts a continuing program geared to growth and diversification of the corporation. These new plants and the recently acquired subsidiaries themselves are representative of the progress we are making in this area."

Flex - O - Lite Manufacturing Corp. of St. Louis, a leading producer of reflective and industrial glass beads is establishing a new Canadian plant in the Montreal area of Quebec. It will be a unit of the company's Canadian counterpart, Flex-O-Lite of Canada, Ltd., which currently operates a plant at St. Thomas, Ontario. The ultra modern plant will produce Flex-O-Lite to double its Canadian output.

Standard Pipe Protection held opening ceremonies Friday at its new modern plant in Pittsburg, Calif. A tour of the plant was held and visiting businessmen watched the application of polyethylene coating to steel pipe used in transmission and distribution lines. Other pipe protection plants are located in Alton and Houston, Texas.

## Terminus of Land Ferry Near Quad-Cities

A new transportation plan that may solve future problems of traffic congestion by providing an automobile land ferry moving large numbers of automobiles and their passengers from one location to another at super speeds has been conceived by General American Transportation Corporation of Chicago.

The imaginative program calls for RRoilway cars 28 feet wide, each with a passenger lounge in front and space for 12 autos loaded crosswise behind the lounge area, forming automated trains with electrical power that would run at top speeds exceeding 150 miles per hour.

RRoilway — which stands for Rail Road Tollway — has designed its first detailed program for a system that would originate in Chicago, run through the Peoria-Bloomington area, Springfield and terminate at a point just short distance east of the Quad-Cities.

According to "Commerce," a Chicago business magazine, this would connect Chicago's six million people and two million automobiles with the 325,000 people and 117,000 automobiles of the Peoria-Bloomington area, the 147,000 people and 53,000 automobiles of the Springfield area,

more than two million people and 600,000 automobiles of the St. Louis area and the 454,000 people and 352,000 cars of the 22 counties in the central and southern sections of Illinois.

One of 7 Studies The Illinois RRoilway plan is a sequel to the studies made by GATX — the designation under which the General American Transportation Corporation operates — for the U. S. Department of Commerce. The Chicago-St. Louis route is one of seven economically feasible routes chartered.

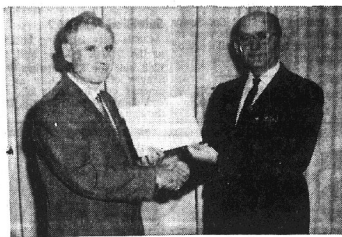

A group of private companies to undertake a five-year research and experimentation program is being formed by GATX to develop the Illinois RRoilway. The companies involved are in fields necessary to furnish RRoilway component parts such as electronics, steel, air frame construction, electrical equipment and related items. The group also would build prototype cars, tracks, roadbeds and other system parts. William T. Yivisaker, GATX vice-president who heads the RRoilway project, said cost of the four-year program would be around six to eight million dollars. Possibly two million of this

would come from federal grants.

Financing Big Job Financial support of the project will be a big undertaking, Yivisaker said, "and until all studies are complete we cannot say for sure what the possibilities are, or the degree of risk involved."

Construction of the Chicago-St. Louis route is estimated at 300 million dollars, but "if RRoilway proves to be as good as it appears and if support can be generated for an Illinois RRoilway, it is possible the state could attract a good section of the ninety million voted for federal research and development funds," Yivisaker notes.

Based on current research figures, the Chicago-St. Louis RRoilway would cost \$875,000 per mile to construct, compared with four-lane expressway costs of \$1.7 million per mile. A four-lane expressway saturated to capacity handles 1750 cars an hour. At speeds of 150 miles per hour, RRoilway could handle 4375 cars per hour.

Twenty years of service with the Federal Government is honored here as Robert L. Walsh (right) receives his certificate from his supervisor, C. R. Corbin. Walsh lives at 3016 Forest avenue.

### Calling All Home Makers

By Aaron Fredman  
SHOULD FURNITURE BE MIXED OR MATCHED?

Many people select chairs for their homes because they are lovely to look at. Others select chairs strictly for comfort. The smart buyer buys chairs that do both.

This is not always as simple as it sounds. Generally, the wife will select chairs for design, color and coordination with everything else in the room. The husband will want to stretch his legs out into. Fortunately, the average living room has room for several chairs that can please all parties concerned. Just like a suit of clothes or a dress, a chair can "fit" the person who is going to use it. That's a good thing to keep in mind when you buy chairs. Very often chairs are nice when used in matching pairs. This is not only a matter of attractive decor, but has its practical side, too, in making conversation groups. Many people are more at ease talking to each other while sitting in separate chairs than they are when sitting together on a sofa.

One of the attractive ways to group a pair of chairs is to use a wedge or pie-shaped table between them. This makes for a curved grouping instead of lining up the two chairs and the table straight against the wall. We invite you to see our latest selection of living room chairs, and talk over with us decorating ideas on using chairs in your living room to get both beauty and comfort. So remember, when shopping, our decorating and sales staff here at Fredman Bros. Furniture Co., Niedringhaus and Delmar Ave. in Granite City, is always ready to serve you. We are open Monday, Tuesday and Friday night until 8:30 p.m., other nights until 8:00 p.m.

These persons are assisted by the Health Services Fund, which during 1964, also provided aid to

A one-day annual managers meeting was held last week in Granite City, with the Granite City Metal Decorating Division of Caine Steel Co. playing the role as host.

Forty-four managers and corporate personnel of Caine Steel from various sections of the country attended the meeting and viewed a display of the local firm's products.

Located in the heart of the Granite City Industrial Center (old Nesco building), the decorative company is concerned in the automatic coating of steel sheets with colorful enamels.

Mr. Roderick W. Key, manager of the local plant, has a staff of 25 employees engrossed with the coating of sheets, and then the baking them to a hard finish. "Some specifications require intricate designs which are lithographed and printed over a background which again are baked and fabricated," Key said.

Types of Products  
Basic finished products of this process include TV snack trays, waste baskets, canister sets, containers of all types, and advertising point of purchase signs.

The Granite City Division, one of seven plants in the Caine industries, provides products for manufacturers, not only in the Midwest, but as far west as Portland, Ore., as far south as Atlanta and Dallas, and as far east as Cleveland, Ohio.

Louis J. Smith, St. Louis, was arrested Thursday at 23rd and Iowa streets on a charge of driving no brakes on the trailer of his truck. He was summoned for a hearing by Nov. 6.

Smith was driving a truck which was absorbing the remaining cost.

In the 1966 United Fund budget, the Health Services appropriation is reduced to \$7500 from the \$9000 allocation received in previous years. Reason for the reduction was explained by John Solenberg, UF executive director, who said a separate \$2000 allocation is being made this year to the Arbitration Foundation, which will provide unlimited services to local residents. He added that the Quad-Cities United Fund will now pay its fair share of the Foundation's overhead and also be concerned for its research program services fund, with the local hospital's new allocation.

And defrays expenses of heart patients who are unable to pay for services at the bi-monthly health clinic.

In some cases, three-fourths of a hospital bill may be authorized for payment from the health services fund, with the local hospital's new allocation.

## Utility Seeks Added Gas Storage Facilities

Development of a large underground gas storage field near St. Jacob to increase peak winter supplies of gas to the area is planned by Mississippi River Transmission Corp., natural gas pipeline company serving the greater metropolitan area.

The firm has filed an application with the Federal Power Commission calling for expenditure of \$25 million to develop the storage field. This is in addition to \$3.4 million invested to date in exploration, leasing, storage facilities and gas injected.

At the same time the company requested temporary authority to withdraw gas as available from the field for use in its pipeline system during the coming winter.

The field is contained within 12,900 acres of land. A total of 14 wells are drilled into or through St. Peter sandstone formation which lies at a depth of about 2550 ft. About three billion cubic feet of gas have been injected into the proposed storage zone.

The new work includes seven additional wells, about 27,000 feet of lines connecting wells within the field and necessary compression equipment. Most of the work will be completed by 1966.

## GC Education Group Annual Dinner Tuesday

Close to 100 local educators are expected to attend the third annual smorgasbord, sponsored by the Granite City Education Association at 6:15 p.m. tomorrow in the Granite City high school cafeteria.

The guest speaker will be Dr. Ann-Marie DeMoret - Bonacci Hamburg, an associate professor of Modern Languages at St. Louis University. The program, arranged by Miss Hazel Towery of the high school faculty, also will include a musical interlude.

Dr. Hamburg, a graduate of the University of Paris, joined the Modern Language department at St. Louis University in 1960 and received an associate professorship earlier this year. A world traveler, she also has taught in England, at the University of Quebec, Canada, and Maryville College of the Sacred Heart, St. Louis.

A member of the Academy of French Classical Poets, Dr. Hamburg has published three volumes of original French poems. In addition, she is an accomplished playwright, having had several works produced in Canada and her native France.

One of her most successful plays, a comedy, "L'Heure Eblouissante" had a 12-month run at a noted Paris theatre, while a dramatic play, "Il-Matched" was produced at the St. James Theatre in Montreal, Canada.

The latter was later adapted for presentation on Canadian network television. In January of this year, Dr. Hamburg was appointed the St. Louis area France-France representative. Previously, the educator was a member of the French press.
